shape, you clear out all the junk and stuff making it run slower (because installing all this server software certainly isn't going to make it run faster!) and that you have installed any outstanding updates.

'''ANOTHER NOTE''': Watch out for the irritating "Do you want this program to get control of your computer" window that comes up at various stages. Sometimes it didn't appear but you do see a shield dimly flashing in the task bar. Click and say yes.

==Step 1: Install MySQL==

*Install the MySQL database server on your PC. We will do this using the 'MSI' one-click installer for Windows. Go to [<https://dev.mysql.com/downloads/installer/>] and download the '''mysql-installer-community-5.7.30.0.msi'''.

*Run the installation. Click...

** Install MySQL products

** Accept the license

** Allow the version check (optional)

** At 'Choose a Setup Type' accept the "Developer Default" and click Next

** A number of downloads of required software may be identified. Click Execute and follow onscreen instructions to install them.

** At 'Installation progress' screen, hit Execute - the MySQL software will be installed

** At 'Configuration overview' hit Next to go to the basic configuration screen.

** Accept all the defaults on the 'MySQL Server Configuration' and hit Next.

** On the password screen, supply a password for the 'root' (main administrator) user. Make sure it's one you won't forget. You can also create a 'User' account just for Moodle with

Summary:

A few updates to the existing document which might make the process of ins
